About

As a Front End Developer with over 5 years of experience, my current focus revolves around TypeScript and React. I actively stay updated with the latest trends in the Front End world and enjoy experimenting with new technologies to continuously enhance my skills.

Work Experience

Mindera   2018 - Present

Front End Developer

I have been in Mindera for more than 5 years now and, since then, I have had the chance to work for companies like Trainline and Instant Group.

Trainline

Worked across various teams and parts of the business helping to build new features, ranging from the main train ticket-selling website, to the post-sales and help desk websites. I worked mostly with TypeScript, React, Redux and Node.js.

Instant Group

Currently part of a team tasked with building a brand new website that will have the ability to search, book and manage workspaces. Using technologies such as TypeScript, Tailwind CSS and Next.js, we are leveraging the latest features in React such as React Server Components and Server Actions.

Education

University of Aveiro   2015 - 2018

Bachelor's degree in New Communications and Technologies

Skills & Technologies

`JavaScript` `TypeScript` `React` `Next.js` `Tailwind CSS` `Node.js`
